

CSS AD Configurator

Overview

Name	CSS AD Configurator
For Product	dynaTrace Data Center RUM
Description	This utility allows the user to identify the values that needs to be configured for integrating CSS with Active Directory LDAP.
Author	Kenneth Tong
Version	1.1
Support	Not Supported
Download	CSS_AD_Configurator.zip

Tool Information

This utility prepopulates some fields with values obtained using the Windows credentials for the current user. It also allows the user to change the values and verify the configuration. Once the configuration is verified, simply copy and paste the values to the proper fields in CSS Active Directory LDAP configuration page

Installation

There are no installation instructions. This is just an executable. Simply run the executable on the machine that is hosting the CSS.
