

# Dynatrace Network Application Monitoring 2018 GA is available

## Network application monitoring has just got better!

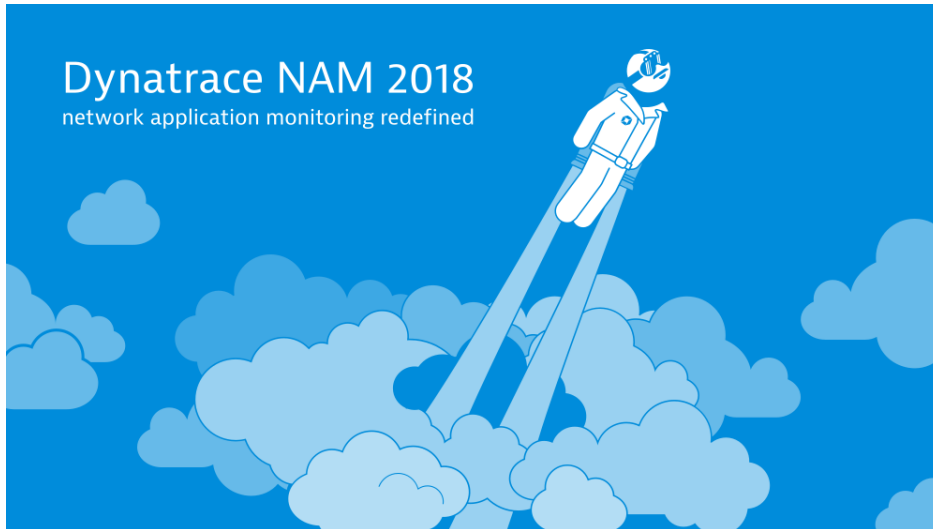

DC RUM becomes **Dynatrace Network Application Monitoring (NAM)**.

We're thrilled to release NAM 2018.

## NAM 2018 downloads

You will find the component installers in [Downloads](#). Don't expect to find an ADS installer there. It's replaced by [Advanced Diagnostics on Demand](#), the new NAM Server feature.

## Want to know more?

- Check the [Release Notes](#).
- Check the more technical information in [Changes in NAM 2018](#).
- Prepare for [upgrade and installation](#).
- Read [What's in a NAME](#), Gary Keiser's blog clarifying the context behind the name change.
- Sign up for [What's awesome in NAM 2018 release webinar](#) scheduled for September 26th.

## Release schedule

We're planning to release the first Service Pack by the end of October 2018. The exact date may change depending on the Service Pack scope.
