

Unable to see tests in the Performance Tests tab of the Dynatrace Classic Portal

Information:

Environment

- Dynatrace Classic Portal
- Active Data Center XF

Symptoms

When I select the Performance Tests tab of the Dynatrace Classic Portal, instead of seeing tests I see the message "Gomez Web Performance Management Optimize your Web application availability, performance and experience".

Solution

To fix this problem:

1. Select **Admin**.
2. Click **View/Edit Test Preferences and Test Defaults**.
3. Click **Default Views**.
4. Click **Transaction**.
5. Click **Submit**.

If this doesn't work, log in as a different Power End-User and retry.
