

Compbytes in Last Mile data feeds

Information:

Environment
<ul style="list-style-type: none">Last Mile

Solution
<p>Compbytes included in data feeds for Last Mile tests is the number of bytes downloaded. This is the Total Bytes attribute, the total number of bytes downloaded for this transaction.</p> <p>This data can be found either by drilling into the data until you get to the waterfall chart or by changing the metric being charted to Number of Bytes: Above the Interactive Chart, from the Metric list, select Number of > Bytes.</p>
