

Why Webservice displays a different URL

Information:

Environment

- Web Services
- XML request calls
- Dynatrace Synthetic Monitoring Data Feeds

Symptoms

The page displays a different URL as the one I have. For example:

What I have:

```
http://gsr.webservice.gomez.com/AlertManagementService/AlertManagementWS.aspx/GetAlertHistory?
username=USERNAME&password=PASSWORD&monitorType=ALL&startTime=2012-4-19
00:00:00&endTime=2012-4-19 23:59:59
```

Page Displayed:

```
http://gsr.webservice.gomez.com/AlertManagementService/AlertManagementWS.aspx/GetAlertHistory?
username=USERNAME&password=PASSWORD&monitorType=ALL&startTime=2012-4-19%2000:00:00
&endTime=2012-4-19%2023:59:59
```

Solution

The two URLs are actually the same. The Page Displayed URL is using a different format for space: %20 is the code for a space.
