

# Sign up for webinar - Get visibility into enterprise applications - September 6

Krzysztof Ziemianowicz, Senior Product Manager at Dynatrace, is running a **live webinar** to demonstrate how Dynatrace can help extend your visibility to monitor and optimize every single transaction, even across 'black box' enterprise applications.

When?

**Tuesday, 6th September, 10am BST/ 11am CEST. [Register here!](#)**

Open Q&A session after the presentation.

Learn how to resolve performance issues in enterprise apps and cloud-based services with insights from network wire data. Monitor key enterprise applications such as Citrix, SAP and Oracle EBS to Salesforce.com, Office 365, and more.

**Find out more on the webinar and register now** to see how DC RUM can work with AppMon to monitor and optimize application transactions as well as the user experience of data center applications.

If you have any further questions or suggestions for future webinar topics, please drop us a line at [community@dynatrace.com](mailto:community@dynatrace.com)!
