

Interactive Chart using metric DOM Interactive and grouped by Aggregate All

Information:

Environment
<ul style="list-style-type: none">• Dynatrace Portal• Interactive Chart
Symptoms
I was unable to create a chart with multiple tests using the metric DOM Interactive and the Group By setting Aggregate All .
Solution
To be able to chart the DOM Interactive metric grouped by Aggregate All, <i>all</i> tests must have Include client (non-network) time in results enabled. This setting is available for Backbone, Private Last Mile, and Mobile tests. For more information, go to Tests in the documentation, and select the "settings" page for the test type.
Root Cause
All of the tests being charted did not include the client time in the results.
