

Can I change the Operations Dashboard parameter defaults

Information:

| Environment |
|---|
| <ul style="list-style-type: none">• Dynatrace Portal• Operations Dashboard |
| Symptoms |
| When I view my Operations Dashboard, it always shows me the End to End time. Can I change the default to Availability? |
| Solution |
| <p>The default parameter settings of the Operations Dashboard display the average End to End Time over the past 1 hour.</p> <p>When the dashboard is loaded, you can change the parameters. If necessary, click Show Parameters to display the settings you can change.</p> <p>Click Apply to update the dashboard with the new settings.</p> <p>The parameter settings are automatically saved, and will be applied to the dashboard the next time you display it.</p> <p>For more information about managing Operations Dashboards, see Using Operations Dashboards in the documentation.</p> |
