

How to change a test from all object type to no object

Information:

Environment
<ul style="list-style-type: none">• Synthetic Monitoring Backbone
Symptoms
How to change a test from all objects type to no object.
Solution
Unfortunately, we can not turn off object collection for a 'single step/URL test' in either the Dynatrace Portal or the Dynatrace Classic Portal. Once the object collection has been set for a test, it can not be changed when edit the test. However, we are able to edit object collection for tests that have multiple steps.
Root Cause
Working As Designed.
