

Where to find the scripts that can be seen from Recorder but not under Tests in portal

Question:

I saw a few scripts displayed in Recorder listing as Last Mile or Private Last Mile scripts and with status as active. But under Tests page in portal, I didn't find any tests.

Those scripts were old and should be deleted. Can you show us how to delete?

Answer:

When Last Mile or Private Last Mile Batch Order was created and then deleted, the scripts that were included in that Batch Order will be kept.

And those scripts can be found under the create new batch order page.

1. Go to Tests
2. Go to Batch Order tab
3. Click on Create Last Mile Batch Order or select Create Private Last Mile Batch Order from the drop down menu
4. Change the Agent type to desired and you will see the scripts listed there

To delete those scripts, please contact Support team.
