

# Can I edit a Last Mile or Private Last Mile test name or URL

## Information:

Environment
<ul style="list-style-type: none"><li>• Last Mile</li><li>• Private Last Mile</li></ul>

Question
Can I edit a Last Mile or Private Last Mile (PEER) test name or URL?

You can edit the test name. In the Synthetic Classic Portal:

1. Click **Tests** in the **Manage** section of the navigation menu.
2. If necessary, use the page filters to find the test.
3. Expand  the test, then click **Edit test** below the test details to open the test into the editing screen.
4. Type the new name in the **Edit Test Name** field.
5. Make any other changes, then click **Update and Finish** to save the changes.

Last Mile and Private Last Mile (private peer) tests were designed in a way that allows you to run the same test in multiple batch groups. Because of this, there is no way to edit the URL in the Synthetic Classic Portal.

However:

- If the test is a **Transaction** and was created using a Windows Recorder script, you can download the script from the Synthetic Classic Portal to the Recorder, edit the URL in the script, and upload the script back to the Portal.
- If the test is a **Single URL**, submit a Support Ticket to request the change. Include the exact current Single Page test name or monitor ID, and the URL that you want to change the test to.
