Get the latest news about Synthetic Monitoring release updates, early access programs, events, webinars, and featured content delivered directly to your email inbox. Learn more about how to stay informed about the latest Synthetic Monitoring and general Community news.

## Dynatrace Synthetic Monitoring June 2017 Webinar Recording (29 JUN 2017)

The Dynatrace Synthetic Monitoring Webinar Recording is Now Available!  Watch the replay to learn about:

1. Monitoring Internal Applications with Software Private Agent
2. Measuring Modern Application Performance with Visually Complete/Speed Index
3. Reducing Mean Time to Identify with Synthetic Problem Detection + Full Stack Root Cause Analysis
4. Extending Synthetic w/ Real User Monitoring for to Monitor Every User, Every App, Everywhere

## Next Dynatrace Online Performance Clinic (24 APR 2019)

Dynatrace Real User Monitoring automatically captures every user, their behavior and lots of metadata such as geolocation, browser, timings and more. Session and User Action Properties are a new way to enhance this metadata with domain and business specific data that is relevant for your applications. Join this Performance Clinic and hear from Klaus Enzenhofer, Technical Product Manager at Dynatrace, on how to feed additional business data from your own code execution or external monitoring tools such as Adobe or Google Analytics to Dynatrace. Klaus will do a hands-on walkthrough on configuration, analytics, and integration use cases such as leveraging the Dynatrace User Session Query Language (USQL) to integrate this data with other 3rd party business analytics tools. Also, make sure to have your questions ready as we are opening up for public Q&A at the end of the session!

## Next Dynatrace Online Performance Clinic (16 APR 2019)

Synthetic Monitoring is one of the key ingredients of a successful digital experience monitoring strategy. The main use cases we have seen it used is for Availability and Performance Baselining. Join this Performance Clinic and hear from Philipp Kastner, Technical Product Manager at Dynatrace, on how you can leverage Dynatrace Synthetic to monitor your key applications, APIs and end-user journeys. Philipp will do a hands-on walkthrough showing you how to set up your own Click Paths, HTTP Monitors or how you can use the Dynatrace Synthetic API to automate synthetic test execution into your DevOps Toolchain!

## Next Dynatrace Online Performance Clinic (14 FEB 2018)

How do you connect technical problems to business problems? This session will walk you through how to use Dynatrace RUM to better understand how issues are impacting your end users. We will walk through how to define conversion rates, understand how performance impacts bounce rates, unlock different digital touchpoints, diagnose client side problems, view individual user sessions and give a view into replay what a user saw during their sessions

## Perform 2018 - Accelerate digital innovation! (21 DEC 2017)

This year's Perform conference has an unbeatable list of VIPs, technical innovation that will blow your mind, and global customer stories from some heavy hitters. Register today!
