Product Updates

- The third update for **Dynatrace AppMon 6.3 has been released!** If you are still using 6.3.0 please upgrade as soon as possible and refer to our [technical alerts](#) page for information regarding a critical issue in version 6.3.0. **AppMon & UEM 6.3.3** is now available on our [download page](#). A detailed description of the new features and fixes can be found [here](#).
- The next update for **Dynatrace AppMon & UEM 6.2** is now available on our [downloads](#) page. You can update from all previous public updates by downloading and installing the update bundle or following the instructions in your Dynatrace AppMon & UEM client. A detailed description of the new features and fixes in **Dynatrace AppMon & UEM 6.2.7** can be found [here](#).
- Introducing the [Generic Measure Monitoring Plugin](#), this plugin opens an HTTP REST Endpoint so that external tools such as JMeter, Load Runner, Synthetic Monitoring Tools ... can FEED measures into Dynatrace. Thanks to Andreas Grabner for providing this plugin!

Community Updates

- Sign up to receive AppMon + UEM news alerts sent directly to your email inbox. Get timely information about the latest release updates, early access programs, events & webinars, as well as general Community news. [Learn more about how to sign up](#).
- The Open Q&A forums are now truly open! We've lifted the login requirement for these forums to allow you to search for answers using your browser's favorite search engine. Note that you'll still need to login to participate. [Learn more about our new open forums](#).
- We've moved to a better distribution network to help you download our software faster than ever before.

Dynatrace University

- Summer is warming up and so is the lineup of [vILT](#)! We are doubling down and just released 14 new sessions! Our last 10 sessions have been sold out, so hurry while there are still available seats. Buy now, attend later, but don't end up on the waiting list!
- Want to stand out in the Dynatrace community? Look no further than our outstanding certification program. Check out our [guided learning paths](#) to properly prepare you to be Associate or Professional certified. Already certified? Make sure to login to Dynatrace University to check your certification status in [My Learning](#).
- Are you learning and experimenting with your DevOps environments? Can't find the needle in the code stack? Schedule a private one-on-one [vCafe](#) session with Dynatrace's best practitioners to accelerate your understanding of the Dynatrace platform.

Webinars

- Catch the replay where we discussed transitioning from operating ungainly applications using waterfall development methods and a hard-to-maintain code base into modern IT organization applying Agile development, DevOps and service-oriented architecture to sell its products. [6 Ways DevOps Helped PrepSportswear Move from Monolith to MicroServices](#)
- Join Nita Awatramani Associate Director, Verizon Enterprise Solutions & Andreas Grabner, Dynatrace Performance Advocate, to see how Verizon re-invented how they develop, deploy and run the software supporting their business to remain competitive, profitable and relevant. [Register now!](#)
