

Kofax FastPack

Overview

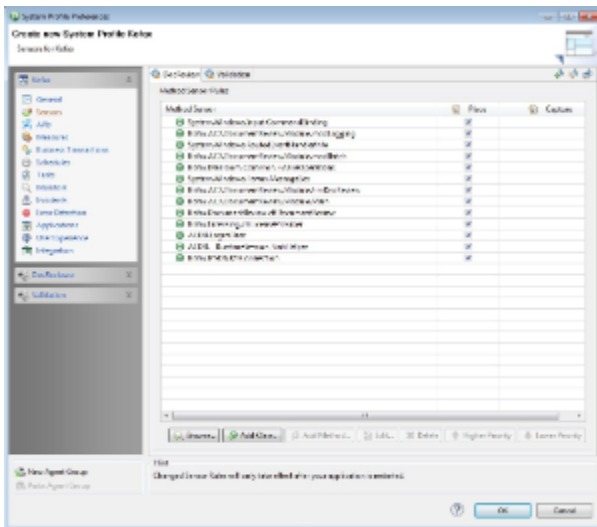

Kofax is an integrated platform of applications that streamline the transformation of different document types into structured electronic information, ready for delivery into business systems and processes. Part of the suite includes document review and validation components. It is important to monitor and diagnose how these components are performing on the end users workstation. Kofax provides their own monitoring solution, but you can get performance metrics by instrumenting this in dynaTrace.

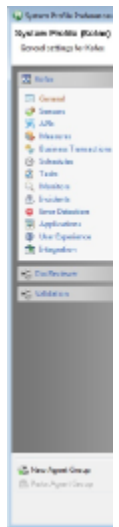

FastPack Details

Name	Kofax FastPack
dynaTrace Version	>= 5.5
Author	Derek Abing
License	dynaTrace BSD
Support	Community Supported
Download	Kofax_Fastpack_1.0.0.zip
