

Android Auto-Instrumentation UI

 In Dynatrace 6.1, the auto-instrumentation UI is included with the product. Please see the following page for more information: [Auto-Instrumentation for Android](#)

Overview

Name and Version	Android Auto-Instrumentation UI 1.0
Compatible with	dynaTrace 6
Author	dynaTrace Software
License	dynaTrace Experimental Software License
Support Level	Supported
Download	setup.exe
Description	The Android Auto-Instrumentation UI provides an easy to use interface to configure an app for instrumentation.

Installation

To install the Android Auto-Instrumentation UI, download the attached [setup.exe](#) onto your Windows PC and launch and navigate through the installer.

Usage

Once installed, attach your Android device to your PC with a USB cable and go to the Start Menu and launch the shortcut Compuware->Android Auto-Instrumentation UI. After it is launched you will need to provide your Monitoring Server URL and then you can begin to instrument your apps.
