

# What does error 15200 mean

## Information:

Environment
<ul style="list-style-type: none"><li>• Chrome Browser Agent</li></ul>

The 15200 error codes are specific to the Chrome Browser Agent:

QUIC\_HANDSHAKE\_FAILED 15200

QUIC\_PROTOCOL\_ERROR 15200

REQUEST\_FOR\_SECURE\_RESOURCE\_OVER\_INSECURE\_QUIC 15200

RESPONSE\_HEADERS\_TRUNCATED 15200

For more information on QUIC, see the Chromium Blog article [Experimenting with QUIC](#).

If the error message is

```
{ ErrorCode : 15200, ErrorMessage : 'ERR_CONTENT_DECODING_FAILED' }
```

the likely cause is that your HTTP request's headers claim that the content is gzip encoded, but it isn't. Turn off the gzip encoding setting or make sure the content is in fact encoded.
