

Content match on text in the URL of a downloaded object

Information:

Environment
<ul style="list-style-type: none">• Dynatrace Synthetic Classic Platform

Solution
<p>Currently, you can't configure a content match for text in a downloaded object's URL. Content Match is designed to match only text in the source code of HTML pages, not the objects in those pages.</p> <p>However, we may be able to configure this type of content match for you. For more details, please contact Support.</p>
