Tuxedo Monitor

Generic Measure Monitoring Plugin

This plugin opens an HTTP REST Endpoint so that external tools such as JMeter, Load Runner, Synthetic can FEED measures into Dynatrace.

JVM Monitoring Plugin

This plugin allows you to dynamically gather JMX metrics from MBeans.

SOLR Remote Monitoring Plugin

The Dynatrace Remote Monitoring Plugin for SOLR enables remote monitoring for applications using the SOLR Search Engine. The monitoring plugin statistics using the SOLR administration interface, so no JMX access is required.

NGINX Plus Monitoring Plugin

The NGINX Plus Monitoring plugin enables monitoring of your NGINX Plus environment. It queries the metrics by nginx status endpoint (ex. <http://demo.nginx.com/status>) and writes them into the Dynatrace Performance. In addition, it contains example dashboards that show how metrics can be used in Dynatrace.

Oracle iPlanet Monitoring Plugin

Plugin for monitoring iPlanet stats. Requires iPlanet's stats-xml page to be enabled

TIBCO EMS Monitor Plugin

This plugin will capture messaging-related metrics from TIBCO EMS. The measures are composed of broad destination level measures. The plugin also allows for splitting by topic/queue name when charting the destination level measures.

Windows Event Log Monitor

The Windows Event Log Plugin will monitor the Windows Event Log for the existence of a given event. It stores the data in a SQL database so that it knows where it ended the last time it ran so it's not seeing the same events over and over.

RunQueue Monitor Plugin

This plugin retrieves the size of the Run Queue from the specified host(s).

FTP File Checker Plugin

This plugin checks the existence of a given file on an FTP Server and returns the result as a measure value.

Varnish Stats Monitor Plugin

Varnish is a web application accelerator. You install it in front of your web application and it will speed up the response time.

Endeca Monitoring Plugin

This monitor collects health and performance information from the Endeca dgraph server.

Top Process Monitoring Plugin

The Top Process Monitor plugin enables monitoring processes consuming the most CPU Time and/or Resident/WorkingSet memory and stores the dynamic measure.

License Count

The license count plugin queries the agent overview to get the licenses being currently utilized by technology.

Rabbit MQ Monitor Plugin

The monitor returns a number of values associated with RabbitMQ. The RabbitMQ Monitor makes 2 initial REST interface calls which get the overview and node information.

Log File Monitor

The monitor searches a Windows or Linux log file for text or regular expression and returns if a new line was found, and the last line number to correlate.

Paging Space Utilization Monitor Plugin

The monitor returns the percent usage of the paging space via the command below on AIX servers. The command is specific to AIX. The user configuring the monitor must have ssh access to the remote server you wish to monitor.

Availability Monitor Plugin

The availability monitor can be used to test if a server can be pinged, and will also check to ensure that DNS and reverseDNS capabilities are functional.

IBM MQ Queue Channel Monitoring Plugin Comments

Message Flow Statistics Monitoring Plugin

This monitor collects message flow statistics by connecting to the MQ Manager.

Web Transaction Monitor Plugin

Allows you to execute a multi step web transaction script to be used to e.g: verify availability or functionality of critical web transactions

URL Monitor Plugin Community Edition

This plugin extends the dynaTrace URL Monitor plugin and allows specifying a timeout for connections

WebSphere DataPower Monitor Plugin

This plugin enables monitoring of the WebSphere Data Power SOA Appliance.

DB2 Monitor Plugin

The DB2 plugin enables monitoring behavior metrics provided in a DB2 database.

AIX Filesystem Status Plugin

The monitor gets the filesystem percent usage via the df -Plk command. The user credentials entered when configuring the monitor must have ssh server you wish to monitor.

IIS Monitoring Plugin

The IIS Monitoring Plugin extends the Windows Performance Counter Monitor with **pre-configured meas Information Services**

Linux Filesystem Status Plugin

The monitor gets the filesystem percent usage via the df -Plk command. The user credentials entered when configuring the monitor must have ssh server you wish to monitor.

Linux Process Monitor Plugin

The monitor gets the process count via the ps -fu command. The user credentials entered when configuring the monitor must have ssh access to t wish to monitor.

Oracle Monitor Plugin Comments

SOAP Monitor Plugin

The SOAP Monitor verifies availability, content, and access time for specified SOAP requests to ensure the availability of SOAP Services. It supports communication and HTTP proxies.

SQLServer Monitoring Plugin

WebSphere MQ Monitoring Plugin

The WebSphere MQ Monitoring plugin enables you to monitor your queues and topics and relate these metrics to applications overall performance.

Windows Process Monitor Plugin

The plugin is querying the specified process on the given host(s) using the Windows tasklist command.

Windows Service Status Monitor Plugin

The plugin is querying the specified service on the given host(s) using the Windows SC command which connects to NT Service Controller and Services.

Exchange Server Performance Counters Plugin

These plugins **extend the out-of-the-box Windows Performance Monitor Plugin** allowing you to **monitor your Exchange Server** that may have the Client Access, Hub Service, Mailbox, Unified Messaging, or Edge installed.

BizTalk Monitor Plugin

Monitors BizTalk Host Instance specific Windows Performance Counters for a specific BizTalk Host Instance using the dynaTrace Windows Performance Counter Monitor.
