

Technology Support Plugins

Your applications rely on Spring, Hibernate, Peoplesoft, SAP, ...? Extend your the out-of-the-box support of Dynatrace by installing the following FastPacks.

Don't find a plugin or got a general question on this topic?

Please use the [App Mon & UEM Open Q&A Forum](#) to ask for new plugins that would make your life easier but that are not yet available. If you have plugins to share us the forum to see if somebody else would benefit as well.

Tuxedo Monitor

Real Time Data Feed Listener

Implements a listener for the Real Time Business Transaction Data Feed Feature of Dynatrace. It allows you to easily get LIVE metrics from Dynatrace to be used during any automated test to enrich your reports!

UEM PureLytics Heatmap

JavaScript Browser Extension to visualize UEM User Action Clicks as a Heatmap. To be used with Browser [Greasemonkey](#)

Elasticsearch Fastpack

The Dynatrace FastPack for Elasticsearch provides a plugin for Dynatrace which collects various metrics from the Elasticsearch Cluster and sends them to a Dynatrace instance. It also provides a System Profile and a sample Dashboard showing some of the metrics.

SOLR Remote Monitoring Plugin

The Dynatrace Remote Monitoring Plugin for SOLR enables remote monitoring for applications using the SOLR Search Engine. The monitoring plugin collects statistics using the SOLR administration interface, so no JMX access is required.

MongoDB for .NET FastPack

This FastPack gives you visibility into the MongoDB queries executed by your .NET Application

ColdFusion Sensor Pack

This Sensor Pack covers the major components of Adobe ColdFusion

MS CRM 4.0 Sensor Pack

This Knowledge Sensor Pack can be used to help quantify and diagnose performance issues related to Microsoft CRM version 4.0 specific code

PeopleSoft 8 Sensor Pack

This Knowledge Sensor Pack can be used to help quantify and diagnose performance issues related to PeopleSoft and Jolt specific code.

SAP (JCO) Knowledge Sensor Pack

This Knowledge Sensor Pack can be used to help quantify and diagnose performance issues related to us calls from within SAP.
