SMS Notification Plugin

Overview

The dynaTrace SMS Notification Plugin enables dynaTrace to send notifications, such as alerts of incidents, via SMS to cell phones.The plugin is based on the open source project SMSLib, wich provides a flexible communication API, good support for hardware devices and also support for internet SMS gateway services.

The following outbound technologies are supported:

- Clickatell, Internet Gatway
- BulkSMS, Internet Gateway
- SpryngProvider

Plugin Details

Download	com.dynatrace.diagnostics.plugins.SMSNotification_1.1.0.jar

Installation

Import the Plugin into the dynaTrace Server. For details how to do this please refer to the Online Documentation on Plugin Management.

Configuration

The action plugin can be configured with three different setups:

Hardware Device

The following screenshot shows an example configuration for the D-Link DWM-152 USB modem.

Cickatell (Internet Gateway)

Sample Clickatell configuration:

Please note that an API has to be created within the Clickatell administration web console.

BulkSMS (Internet Gateway)

This shows an example of how the SMS Plugin can be configured to use the BulkSMS internet gateway:

Example SMS

Troubleshooting

Please refer to the log file, which contains the full console output of the dynaTrace SMS Notification Plugin:

%dynaTraceInstallation%/log/server/com.dynatrace.test.com.dynatrace.diagnostics.plugins.SMSNotificationAction.0.0.log
