

Community Contribution - New HipChat Incident Message Plugin

Thanks to Tomislav Fiskus we now have a [HipChat Incident Message Plugin](#).

This plugin can send Dynatrace Application Monitoring incident messages to a HipChat chat channel.

If you have any questions, please leave a comment in our [App Mon & UEM Open Q&A Forum](#) with the topic "plugin".

Have you implemented your own monitoring, alert or task plugin, or do you have a default System Profile or Dashboard that you always use for your projects? If you think that others would benefit from it as well and want to share it, just contact us at community@dynatrace.com!
