

# New release of Dynatrace Synthetic Monitoring is now available!

The latest release of **Dynatrace Synthetic Monitoring** is available as of May 12, 2016.

This release includes the following enhancements:

- The upgraded Dynatrace Portal supports the upgrades to the **Dynatrace Performance Network**.
- The new **Retry on Error** setting for Transaction Failure alerts in Backbone tests can prevent false alerts.
- The Web Recorder in the Dynatrace Portal is now GA. You can use the Web Recorder to create transactions and provision tests for any platform that supports the Google Chrome browser.

For details, including a list of the Resolved Issues for this release, see the [Synthetic Monitoring Platform 2016 May Release Notes](#).
