

Software Service -- **LoadBlancer**  
 Analyzer -- **SSL**  
 Rules – **2.2.2.2:443**

Software Service -- **WebServer**  
 Analyzer -- **SSL**  
 Rules – **3.3.3.3:444**  
**3.3.3.4:444**

Software Service -- **AppServer**  
 Analyzer -- **HTTPS**  
 Rules – **10.10.10.10:443**

For these three software services, when, where and why would I use this?

Main Server IP Address	NLB NAT Masking IP Address	Client Port
		false

Or this?

Client IP Configuration	
Client IP Address	Software Service name suffix

Use internal IP addresses  Use external IP addresses
